Hello, I'm Luffy!

FAQ

How do you ensure he uses litterbox?	Cats do it naturally, however, we additionally make sure it's always clean and that Luffy likes the litter brand
What's his diet and why?	Primarily BARF (natural meat with additions). It ensures he stays healthy. Also, with this diet, cat poops don't smell.
How do you ensure he doesn't scratch furniture?	He knows it's bad, but we additionally make sure that any questionable surfaces are covered with cloth. Additionally, we place cat scratchers close by so he has a proper alternative. We replace cat scratchers often so they're always in a good shape for him.
How you ensure he behaves well?	We reward him for good behavior with treats. We never punish him though. Any punishment doesn't work well with cats, anyways.
Is he allowed to go out?	Only with human supervision and on a leash. He enjoys this a lot, though. We also trained him to travel with us by car, and he likes it too.
Can he be left alone?	Igor works remotely and gives him all the attention he needs, however, it's ok to leave him alone occasionally. He behaves well and waits patiently for the owners to come back.
